Profiles of For-Profit Education Management Organizations: 2005-2006

Introduction

The principal conclusion to be drawn from data in the *Profiles of For-Profit Education Management Organizations: 2005-2006* is that after several years of growth, the EMO industry appears to be entering a period of reconfiguration. In this year's *Profiles*, the number of companies listed and the number of schools they manage are down slightly; student enrollment in EMO-managed schools remains steady. These data, however, are primarily driven by what is happening to smaller firms, particularly in Arizona. Thus, despite slight declines in numbers, this is not an industry in decline so much as one in transition.

An EMO, or Education Management Organization, is a for-profit firm that manages a school receiving public funds, including a conventional district public school or a publicly-funded charter school. Schools managed by the EMOs tracked in this report operate under the same admissions rules as regular public schools. The *Profiles* do not cover for-profit private schools, including those that may receive public funds under tuition voucher programs such as those that operate in Milwaukee, Cleveland, the District of Columbia, or until recently in the state of Florida.

Findings for 2005-2006

The *Profiles of For-Profit Education Management Organizations: 2005-2006* is the eighth edition of this report. It identifies a total of 51 companies, down 13 percent

from the 2004-2005 *Profiles*, which identified 59. The number of schools managed by these firms is down 2.6 percent, to 521, from the 535 in the 2004-2005 edition. Although the number of companies is down 13 percent and the number of managed schools is down 2.6 percent, the enrollments in EMO-managed schools remain steady.¹ The number of states in which the companies operate, however, is up: 29, compared with 25 in 2004-2005.

Since 1999, the *Profiles* report has tracked the number of EMOs and the number of schools they manage; it started tracking the annual total enrollments in EMO-managed schools in 2001 (Table 1).

Table 1: Number of Companies, Schools, and States, and Annual Enrollment Totals Profiled by Year

School Year	Number of Companies Profiled	Number of Schools Managed by Profiled Companies	Number of Students Enrolled by Profiled Companies	Number of States in Which Profiled Companies Operate
1998-1999	13	135	N/A*	15
1999-2000	20	230	N/A*	21
2000-2001	21	285	N/A*	22
2001-2002	36	368	142,709	25***
2002-2003	54	406	189,199	26***
2003-2004	51	463	200,403	29***
2004-2005	59	535	239,766**	25***
2005-2006	51	521	237,179	29***

*Enrollment data was not tracked in the first three years of the *Profiles* report.

**The 2004-2005 total annual enrollment was an estimated figure.

***This includes the District of Columbia.

The steady annual enrollment data along with the declines in number of EMO firms and in number of schools they manage reflect three possible developments, none of which are mutually exclusive. One source of decline may be consolidation in the EMO industry. The report documents a merger between two firms and an acquisition that resulted in the name change of a third. A second source arises from specific circumstances in Arizona. The U.S. Department of Education Office of the Inspector General's 2003 audit concluded that for-profit charter schools in Arizona did not qualify as public schools eligible for federal special education or Title I funds.² While the state's Department of Education filed suit in 2005 seeking restoration of the funding,³ a number of charter-school firms apparently responded by restructuring themselves as not-for-profits or establishing nonprofit boards.⁴ In October 2005 a federal judge upheld the U.S. Department of Education's position denying federal aid to for-profit charters in Arizona.⁵

A third factor may be that firms are shifting business models. The growth in demand for supplemental services such as operating summer schools, providing after-school tutoring, and advising schools and districts on ways to ensure compliance with the requirements for "Adequate Yearly Progress" required by the No Child Left Behind Act may be leading some firms to move into these fields and away from school management. This is the case with Edison Schools, an EMO-industry leader discussed later in this introduction.

The Definition and Scope of EMOs

EMOs typically operate schools under contracts issued either by school districts or by other groups authorized to hold charters. For more than a decade public school systems around the country, often under pressure from legislators, governors, or business

leaders, have been experimenting with contracting out certain school management functions to private companies. While this practice has created a market for EMOs, the larger engine of EMO growth has been state charter school laws. Although charter schools are public schools operated with public funds, they are generally established by organizations independent of a school district and are given greater freedom in their day-to-day operations in return for achieving certain specified outcomes. Charter holders may include groups of parents, teachers, or both; academic institutions; and nonprofit or other organizations. Although not foreseen by early charter school advocates, it has become common for charter holders to hire EMOs to manage charter schools on their behalf. Charter schools continue to account for the bulk of EMO contracts. Of the 521 public schools managed by EMOs in this edition of the *Profiles* report, 438 (84%) are charter schools. This is down slightly from the 86 percent recorded in the 2004-2005 edition.

Table 2: Breakdown of U.S. Charter Schools and Those Managed by EMOs

	All School Levels	
	2004-2005	2005-2006
Number of Charter Schools**	2,010	2,319
Number of Charter Schools Managed by EMOs	436	438
Percentage of Charter Schools Managed by EMOs	21.7%	18.8%
Number of Charter Schools Managed by Large EMOs	336	347
Percentage of Charter Schools Managed by Large EMOs	16.7%	15.0%

Note: Non-charter schools are not included in these data. Virtual charter and virtual non-charter schools are not included in these data.

**The number of U.S. charter schools was taken from the U.S. Department of Education's Common Core of Data.

Table 3: U.S. Charter Schools by School Level

	Primary		Middle		High		Other*	
	2004-2005	2005-2006	2004-2005	2005-2006	2004-2005	2005-2006	2004-2005	2005-2006
Number of Charter Schools**	965	1,054	177	221	558	542	310	502
Number of Charter Schools Managed by EMOs	257	256	12	9	96	96	71	77
Percentage of Charter Schools Managed by EMOs	26.7%	24.3%	6.8%	4.1%	17.2%	17.7%	22.9%	15.3%
Number of Charter Schools Managed by Large EMOs	214	213	8	7	67	62	47	60
Percentage of Charter Schools Managed by Large EMOs	22.2%	20.2%	4.5%	3.2%	12.0%	11.4%	15.2%	12.0%

Note: Non-charter schools are not included in these data. Virtual charter and virtual non-charter schools are not included in these data.

*The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

**The number of U.S. charter schools was taken from the U.S. Department of Education’s Common Core of Data.

As Table 2 indicates, there are 309 more charter schools at all levels in 2005-2006 than in 2004-2005. Two more charter schools, however, are managed by EMOs in the current year compared with the previous year. Additionally, the EMOs' "market share" of charters schools has declined. While they managed more than 21 percent of schools in 2004-2005, they manage slightly less than 19 percent in 2005-2006. In short, the EMO industry has not kept pace with the overall growth of charter schools. Finally, Table 3 shows that both EMOs in general and large EMOs (those that manage 10 or more schools) in particular are more heavily represented in the management of primary schools. EMOs manage one in four charter schools, and large EMOs manage one in five.

For some EMOs, however, managing schools actually is a shrinking segment of their business. This is clearly seen in the case of Edison Schools. The company's website includes the statement, "Edison Schools Inc. estimates that in the 2005-06 school year it will serve more than 330,000 public school students in 25 states, the District of Columbia, and the UK."⁶ The company, however, includes in that number its entire range of business lines: "whole school management partnerships with districts and charter schools, summer and after-school programs, and achievement management solutions for school systems."⁷ Meanwhile, the data collected for this report show Edison-managed schools enroll 59,701 students, less than one-fifth of the number of students they report to "serve." It is also worth noting that Edison is one of the few EMOs for which charter schools represent less than half of its public-school-management business—43 charters out of a total of 101, or just over 42 percent.

Factors Shaping the Industry

Federal and state school accountability measures continue to help promote the growth of charter schools of all kinds. The growth of charter schools in turn sustains a market for the services of EMOs that manage them. At the federal level, the No Child Left Behind Act (NCLB) mandates that public schools failing to reach prescribed levels of achievement overall and for sub-populations of students may be subject to a variety of sanctions, including but not limited to orders to reorganize as charter schools or to turn management functions over to outside contractors. Many state laws also encourage the creation of charter schools. The Center for Education Reform reported in November 2005 that there were more than 3,600 charter schools in 40 states and the District of Columbia.⁸

A belief in the benefit of market competition as a means of enforcing accountability underlies the promotion of EMOs both as charter school managers and as managers of District Schools. Charter-school advocates see their proffered solution as prodding district public schools to improve, or risk losing students. Supporters of EMOs as school managers suggest that when hiring outside contractors that can be fired for poor performance, school management can be held more directly accountable for results.

The EMO Record

Reports on charter school effectiveness have been mixed and do not always clearly differentiate charters run by local or national nonprofits from those run by for-profit companies. A recent RAND Corp. brief on California charter schools found that in that state, “charter schools generally perform on par with traditional public schools, but

they have not closed the achievement gap for minorities and have not had the expected competitive effects on traditional public schools.”⁹ Another RAND Corp. report in October 2005 concluded that charter schools may help prompt “positive and significant” effects on student scores in reading and math at nearby public schools. The RAND study, in cooperation with researchers at the University of Tennessee and Texas A&M University, examined eight years of test-score data of individual Texas students, and tracked changes in scores following the introduction of charter schools.¹⁰ Neither report, however, offered specific performance data on charters affiliated with for-profit firms.

A variety of press reports continue to call into question the idea that charter schools, particularly those managed by for-profit EMOs, are more accountable and therefore can produce better results. Additionally, while EMO firms continue to sign new management contracts with charters, other schools are, for a variety of reasons, canceling their contracts. For example, the board of trustees at Seven Hills Charter School in Worcester, MA, decided in April 2005 to sever their contract with Edison Schools, opting instead for what the trustees’ chairman Carlton Watson called “an independent, community-based management structure.”¹¹ An Edison-run charter school in Washington, D.C., the Southeast Academy of Scholastic Excellence, had its charter revoked by the D.C. Public Charter School Board for failure to improve student academic performance.¹² In Rochester, NY, the mayor sought a state investigation and audit of the Edison-managed Charter School of Science and Technology. Mayor William A. Johnson Jr. said the school, which had received more than \$50 million in state funds over five years, had spent “hundreds of thousands of dollars” that were not accounted for. Moreover, the mayor said, the school’s 2005 closing—after Edison only two years earlier

named it as “one of its top 16 exemplary performing schools”—raised serious questions about oversight of the school.¹³

Against this backdrop of continued controversy over Edison, RAND released in October 2005 a report Edison commissioned more than two years previously. The report, although couched in phrases favorable to Edison, reported uncertainty about whether Edison Schools’ performance was comparable or superior to matched comparison schools.¹⁴

Reports of financial troubles and losses at various schools managed by EMOs suggest that some for-profit EMOs are struggling to live up to the expectations of delivering better achievement results at lower costs. Charter Schools USA, for example, reported in February 2005 that it had lost \$1.4 million managing four schools in Lee County, FL. The shortfalls led the company to hold back payment of \$24,349 in food service bills and another \$5,662 for utilities on four schools it managed. The county school district deducted unpaid bills from state funds that it passed through to the charters.¹⁵ One outcome of this sort of difficulty has been a new theme in charter school policy discussion: the assertion that charter schools are inadequately funded compared with district schools. Charter school advocate John Danner of Florida State University argues, for instance, that “Charters are under-funded by current legislation,” producing as a consequence “inequities for the charter students relative to students in other public schools.”¹⁶

“Virtual Schools”: The Growing Edge

So-called “virtual schools” that teach children online continue to expand. Various models for such arrangements exist, but the ones that appear to be growing currently rely on partnerships between for-profit firms and the local school districts with which they contract. A Center for Education Reform representative stated that 147 online schools operate in 18 states and enroll more than 65,000 students.¹⁷

Political support for virtual schools has been uneven. A virtual school proposal was approved in Oregon in early 2005.¹⁸ Under a relationship between Connections Academy and the Scio School Board near Salem, OR, the program employs both online materials and textbooks and other printed materials sent to the students’ homes. Teaching is delivered by parents, who are in contact with district teachers for feedback and guidance, according to the program’s organizers. The school has a student-teacher ratio of about 50 to 1.¹⁹

As with a number of other virtual schools around the country, including Wisconsin, Ohio, and Pennsylvania, the Oregon Connections Academy is headquartered at a rural school. The common practice suggests that such schools may be turning to this kind of arrangement at least in part to raise revenues as demographic changes otherwise drain their traditional student populations. Connections Academy filed applications in Indiana to establish two virtual schools in 2005,²⁰ but proposals were delayed by regulatory concerns, primarily over how such schools would track attendance as required by state law.²¹ In Arkansas, a second attempt to permit state funding of online charter schools was defeated in April 2005.²²

Virtual school firms at times have run afoul of state laws governing them. In

Ohio, for example, the state Department of Education reported in June 2005 that an undisclosed number of students enrolled in Internet-based charter schools had not taken required state achievement tests. An official of one school told the *Akron Beacon Journal* that as many as 82 percent of his school's students had not taken the tests in the 2003-2004 school year.²³

Questionable Relationships

At times, the propriety of relationships between for-profit firms and the government agencies that fund and oversee them have raised questions. Historically the EMO industry has enjoyed a significant amount of influence in the writing of state charter school legislation that in turn sets the terms under which EMOs may operate in the state. A similar development has occurred in the area of virtual schools. The for-profit virtual EMOs K12 Inc. and Connections Academy worked with the American Legislative Exchange Council, a national organization of state legislators that seeks to advance conservative public policy programs, to draft model legislation governing virtual charter schools.²⁴

At individual firms, stories of mismanagement and financial troubles continue to emerge. For instance, management turmoil at Imagine Schools, Inc.—the firm changed ownership three times in four years—was blamed for the failure in 2005 of the Central New York Charter School for Math and Science, according to former staff members.²⁵ While promising curriculum assistance, staff development, marketing, and other services in its contract with the school, Imagine's actual work diminished, a school official told the Syracuse (N.Y.) *Post-Standard*. At the same time, however, Imagine Schools' contracted fees rose to \$475,616 for the 2004-2005 academic year. The school stopped

paying fees as of March 30, cutting the company off at \$356,715 for the year.²⁶

The problematic nature of involving a for-profit, private corporation in the delivery of public services is evident in another respect. Charter Schools USA in June 2005 threatened parents of children attending one of its charter schools with a lawsuit for libel and defamation because of complaints the parents posted on an Internet discussion board about the school.²⁷ Supreme Court rulings give public officials very narrow grounds to sue for libel, but this threat succeeded in one respect; the discussion forum where the critical comments originated was shut down.²⁸

EMOs, School Levels and School Size

The data on EMOs present a picture of an industry that increasingly is focused on the primary grades. As Tables 4 and 5 indicate, primary-level students account for 310,826 out of a total of 682,050 charter school enrollees, or 45.6 percent of all charter school enrollees. Of the 171,168 students attending EMO-managed charter schools, however, primary-level children account for 112,746 enrollees, or 65.8 percent of the total enrollment in EMO-managed charter schools. Of charter students in general, 36.3 percent at the primary level are enrolled in EMO-managed primary schools, compared with 5.7 percent in EMO-managed middle schools, 21.1 percent in EMO-managed high schools and 25.1 percent in EMO-managed schools that do not conform to traditional grade-level configurations.

Table 4: Enrollment in U.S. Charter Schools and Those Managed by EMOs

	All School Levels	
	2004-2005	2005-2006
Number of Students Enrolled in All Charter Schools*	565,648	682,050
Number of Students Enrolled in Charter Schools Managed by EMOs	175,350	171,169
Percentage of Students Enrolled in Charter Schools Managed by EMOs	31.0%	25.1%
Number of Students Enrolled in Charter Schools Managed by Large EMOs	148,031	143,407
Percentage of Students Enrolled in Charter Schools Managed by Large EMOs	26.2%	21.0%

Note: Non-charter schools are not included in these data. Virtual charter and virtual non-charter schools are not included in these data.

*The enrollment for U.S. charter schools was taken from the U.S. Department of Education's Common Core of Data.

Table 5: U.S. Charter School Enrollment by School Level

	Primary		Middle		High		Other*	
	2004-2005	2005-2006	2004-2005	2005-2006	2004-2005	2005-2006	2004-2005	2005-2006
Number of Students Enrolled in All Charter Schools**	277,240	310,826	43,768	53,338	119,999	132,676	124,641	185,210
Number of Students Enrolled in Charter Schools Managed by EMOs	114,591	112,746	3,215	3,037	30,309	28,005	27,235	27,381
Percentage of Students Enrolled in Charter Schools Managed by EMOs	41.3%	36.3%	7.3%	5.7%	25.3%	21.1%	21.9%	14.8%
Number of Students Enrolled in Charter Schools Managed by Large EMOs	102,165	99,865	2,111	2,391	25,047	22,198	18,708	18,953
Percentage of Students Enrolled in Charter Schools Managed by Large EMOs	36.9%	32.1%	4.8%	4.5%	20.9%	16.7%	15.0%	10.2%

Note: Non-charter schools are not included in these data. Virtual charter and virtual non-charter schools are not included in these data.

*The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

**The number of U.S. charter schools was taken from the U.S. Department of Education’s Common Core of Data.

Comparisons of these data with the statistics previously reported in Tables 2 and 3 show that schools managed by EMOs are collectively larger than other charter schools. EMOs manage slightly less than one in five schools (18.8%, Table 2), yet the schools they manage enroll one in four students (25.1%, Table 4)—a mathematical impossibility unless the EMO-managed charter schools are larger than the charter schools they do not manage. The concentration of enrollment in EMO-managed primary schools is even greater. While nearly one in four charter primary schools are under EMO management, more than one in three charter primary school students are enrolled in an EMO-managed school (24.3%, Table 3). This is possible only if the schools themselves are larger (36.3%, Table 5). Finally, the same trends show themselves in the case of large EMOs. Large EMOs manage one in five charter primary schools (20.2%, Table 3), but their schools enroll nearly one in three primary students (32.1%, Table 5).

Large EMOs tend to manage larger than average charter and district schools. As indicated in Table 6, which focuses on all charter schools, students enrolled in charter schools operated by eight of the 12 large EMOs have better than a 50-percent chance of being enrolled in a larger-than-average charter school. For students enrolled in a National Heritage Academies charter school, the chance of being enrolled in an above-average-sized school is 100 percent; for those enrolled in charter schools managed Charter Schools USA and for Imagine Schools, the chance is 94.6 percent.

Table 6: Percentage of Large EMO Charter School Students Who Attend Schools with Enrollments Above the Average U.S. Charter School Enrollment

Large EMOs	2004-2005 Percentage	2005-2006 Percentage
National Heritage Academies	96.5*	100
Charter Schools USA	94.5	94.6
Imagine Schools	92.4	94.6
Charter School Administrative Services	83.3	88.0
White Hat Management	87.0	79.5
Mosaica Schools	85.0	76.8
The Leona Group	78.1	74.0
Helicon Associates	63.9	70.8
Edison Schools	45.9	46.1
Victory Schools	26.8	26.3
Richard Milburn High Schools, Inc.	56.2	17.8
The Planagement Group	0	0

Note: Non-charter schools are not included in these data. Virtual charter and virtual non-charter schools are not included in these data.

* One school, Valor Campus of Detroit School of Industrial Arts (a charter primary school managed by National Heritage Academies), has unknown enrollment. Its enrollment is missing from these data.

Table 7 indicates similar patterns in the case of large EMOs operating charter primary schools. Primary school students enrolled in charter schools managed by four out of the 12 large EMOs have greater than a 50-percent chance of being enrolled in a larger-than-average school. Primary school students enrolled in National Heritage Academies have a 100-percent chance of being enrolled in a larger-than-average school; in Imagine Schools, an 86.8 percent chance, and in Mosaica and Charter Schools USA a 72 percent and 71 percent chance, respectively.

Table 7: Percentage of Large EMO Charter Primary School Students Who Attend Schools with Enrollments Above the Average U.S. Charter Primary School

Large EMOs	2004-2005 Percentage	2005-2006 Percentage
National Heritage Academies	96.5*	100
Imagine Schools	76.8	86.8
Mosaica Schools	85.0	72.0
Charter Schools USA	71.0	71.0

White Hat Management	15.3	20.3
The Leona Group	13.0	14.6
Richard Milburn HS, Inc.	0	0
The Planagement Group	0	0

Note: Non-charter schools are not included in these data. Virtual charter and virtual non-charter schools are not included in these data.

* One school, Valor Campus of Detroit School of Industrial Arts (a charter primary school managed by National Heritage Academies), has unknown enrollment. Its enrollment is missing from these data.

Tables 6 and 7 show that since the 2004-2005 school year some large EMOs have shifted their enrollment patterns, and, in doing so, shuffled the rankings. Where all charter schools are considered (Table 6), four EMOs increased their percentage of students enrolled in larger-than-average charter schools, four stayed essentially even, and four decreased their percentage. Considering only primary charter schools (Table 7), the trend is slightly more pronounced: Five EMOs increased their percentage of students enrolled in larger-than-average charter primary schools, five stayed even, and three decreased their percentage.

Rankings shifted slightly as well. Where all charter schools are considered (Table 6), National Heritage Academies ranked No. 1 in both 2004-2005 and 2005-2006 for the percentage of students under the EMO's management who attended larger-than-average

charter schools. Additionally, No. 4-ranked Charter School Administrative Services moved up from No. 6 in 2004-2005; No. 5-ranked White Hat Management dropped from No. 4 in 2004-2005; and No. 6-ranked Mosaica Schools moved down from No. 5 in 2004-2005. Where only primary charter schools are considered (Table 7), National Heritage Academies again ranked No. 1 and Charter Schools USA No. 4 in both time periods, while Imagine Schools and Mosaica Schools traded No. 2 and No. 3 rankings from 2004-2005 to 2005-2006.

As Table 8 indicates, some students enrolled in charter schools managed by large EMOs attend schools larger than the average district school as well. Again, rankings have shifted and indeed the pattern itself has moderated. In 2004-2005, as Table 8 shows, Imagine Schools ranked first with 63 percent of its charter students attending schools that enrolled more than the average U.S. district schools. In 2005-2006, Imagine Schools has fallen to fifth with 49.8 percent of its charter school students in schools with enrollments above the average for U.S. district schools. The highest-ranking firm in 2005-2006, Charter Schools USA, has increased the percentage of its charter students who are enrolled in schools larger than the average district school, and is the only EMO to have done so.

Table 6: Percentage of Large EMO Charter School Students Who Attend Schools with Enrollments Above the Average U.S. District School Enrollment

Large EMOs	2004-2005 Percentage	2005-2006 Percentage
Charter Schools USA	62.9	68.4
Imagine Schools	63.0	49.8
Helicon Associates	45.8	45.8
Charter School Administrative Services	45.2	45.2
Edison Schools	35.5	35.0
Mosaica Schools	33.5	22.9
White Hat Management	17.6	15.7
National Heritage Academies	15.1*	11.6

Richard Milburn HS, Inc.	0	0
The Planagement Group	0	0

Note: Virtual charter and virtual non-charter schools are not included in these data.

* One school, Valor Campus of Detroit School of Industrial Arts (a charter primary school managed by National Heritage Academies), has unknown enrollment. Its enrollment is missing from these data.

Similar patterns persist when only primary schools are considered, as shown in Table 9. Charter Schools USA ranked No. 1 in both 2005-2006 and 2004-2005, and the percentage of its primary charter school students enrolled in schools that were larger than the average U.S. district school rose to 54 percent. Imagine Schools, moved from No. 3 to No. 2 ranking, although its percentage declined slightly, to 44.8 percent, for 2005-2006. Edison Schools' rank rose from No. 4 to No. 3, as did its percentage from 15.1 percent to 25.5 percent, while Mosaica Schools fell from No. 2 to No. 4 and its percentage declined sharply, from 48.1 percent to 18.1 percent.

Table 7: Percentage of Large EMO Charter Primary School Students Who Attend Schools with Enrollments Above the Average U.S. District Primary School Enrollment

Large EMOs	2004-2005 Percentage	2005-2006 Percentage
Charter Schools USA	48.5	54.0
Imagine Schools	47.5	44.8
Edison Schools	15.1	25.5
Mosaica Schools	48.5	18.1
National Heritage Academies	15.1*	11.6
Charter School Administrative Services	8.1	8.1

Note: Virtual charter and virtual non-charter schools are not included in these data.

* One school, Valor Campus of Detroit School of Industrial Arts (a charter primary school managed by National Heritage Academies), has unknown enrollment. Its enrollment is missing from these data.

Finally, Tables 10 and 11 indicate these patterns do not extend to the small number of Large EMOs that operate district schools. This may reflect the fact that so few district schools are under EMO management. Moreover, both tables reflect a declining percentage on the part of both firms. It is not possible to meaningfully interpret with confidence the meaning of these declines without at least another year's worth of data. The decline of Edison's position on these various lists may further reflect its continuing shift, already noted, away from school management to the provision of supplemental services such as tutoring, summer schools, and the like. Finally, the growth of virtual schools and their enrollment may further complicate these trends.

Table 8: Percentage of Large EMO District School Students Who Attend District Schools with Enrollments Above the Average U.S. District School Enrollment

Large EMOs	2004-2005 Percentage	2005-2006 Percentage
Edison Schools	31.1	21.7
Victory Schools	48.7	22.8

Note: Virtual schools are not included in these data. The companies displayed here are the only companies profiled that manage district schools.

Table 9: Percentage of Large EMO District Primary School Students Who Attend District Schools with Enrollments Above the Average U.S. District Primary School Enrollment

Large EMOs	2004-2005 Percentage	2005-2006 Percentage
Edison Schools	23.9	21.7
Victory Schools	12.8	10.3

Note: Virtual schools are not included in these data. The companies displayed here are the only companies profiled that manage district primary schools.

While the school size data are much less dramatic than they have been in the past, there continues to be a likely financial basis for the focus on primary education. Primary education is less expensive than middle- and high-school education. It is not, therefore, unreasonable to suggest that where large EMOs continue to display larger enrollments of primary schools it is the result of a strategic business decision to increase profits. Further, Sharon Nichols, Gene Glass, and David Berliner have observed that at the primary-school level, achievement outcomes are most readily influenced by standardized curriculum using drill-and-practice-oriented instruction.²⁹ Such methods tend to require less training and talent among staff and can produce short-term test improvement regardless of long-term achievement. The resulting combination of cost-savings and the appearance of quick results may render such strategies appealing to EMOs, regardless of whether they produce long-term benefits for students.

Sources of Data

Compiled each year since 1998-1999, *Profiles of For-Profit Education Management Organizations* documents the number of for-profit firms involved in managing publicly funded schools, identifies the schools they manage, and records the number of students those schools enroll.

The *Profiles* report is compiled from a combination of sources. Internet searches are conducted on the name of each known EMO to identify schools with which the EMOs have contractual relationships. The resulting lists of schools are compared with previous years' lists. When a school previously listed as having a relationship with a particular EMO appears to have dropped off the list, researchers use Internet search engines and news media databases, primarily Lexis-Nexis, to ascertain the reasons for the change. Information is sent to each EMO to verify accuracy, and each EMO is provided with the information that has been compiled and is given an opportunity to correct any errors in the record.

Using the Profiles

The companies profiled represent those that Commercialism in Research Unit and Education Policy Research Unit researchers could identify as for-profit management companies, and are likely to represent only the larger or higher-profile companies in operation. A substantial number of EMOs that operate a small number of schools may not be included in the *Profiles*.

Important changes in the 2006 report:

- A new column has been added to the company summaries. This column references the page number of the company's detailed profile.
- The historical data regarding schools no longer profiled for each company has been summarized as a table in the company profile. Schools that are no longer profiled in this reporting period are listed in detail.
- **Appendix A** contains definitions of terms and notes that will be helpful in understanding the company summaries and profiles.
- **Appendix B** contains detailed notes for each profiled company for the current reporting period and prior reports if applicable. These notes were previously included in the individual company profiles.

It is important to note that while this report labels education management organizations as “profitable” and “not profitable,” the designation in the case of privately held companies is based on the companies’ self-reports. Unlike publicly traded companies that are required by law to make earnings statements public, privately held companies have no such requirement. Fifty of the 51 companies profiled are privately held.

Notes & References

- ¹ The 2005-2006 *Profiles* counts a total of 237,179 students enrolled in schools managed by for-profit firms, compared to 239,766 in the 2004-2005 edition, which was an estimated total.

PROFILES OF FOR-PROFIT EDUCATION MANAGEMENT ORGANIZATIONS: 2005-2006

Appendices

Appendix A: Reader's Guide

Key to Tables

- N/A:** Not applicable. Company was not tracked during this reporting period.
U: Unknown. Company was tracked but data were not available or were unreported.
0: Zero. None reported.

Miscellaneous Notes

- Large company pie chart categories are based on Common Core of Data defined instructional levels.
- Information for no-longer-profiled, small-EMOs schools was not tracked.
- Notes in Appendix B indicate companies that did not respond to repeated requests for company and school data. If there are no notes for a specific company, assume that an updated company profile was returned as a part of this project.

Definition of Terms

- **Charter School:** Charter schools provide free elementary/secondary education under a charter granted by the state legislature or other appropriate authority.
- **Virtual School:** An internet-based curriculum outside of the conventional brick-and-mortar setting of traditional public and charter schools.
- **Education Management Organization (EMO):** An EMO is for-profit, manages at least one school that receives public funds, and operates the public school(s) it manages under the same admissions rules as regular public schools.
- **Instructional Levels:** Instructional levels are calculated from the lowest and highest grades for which students are enrolled in a school.
 - *Primary schools* are those with a low grade of pre-kindergarten through grade 3 and a high grade of up to 8.
 - *Middle schools* contain a low grade of 4-7 and a high grade ranging from 4-9.
 - *High schools* have a low grade of 7 to 12 and must extend through grade 12.
 - *Other* includes all other grade configurations, including schools that are completely ungraded.

Source: CCD Data File: Public Elementary/Secondary school Universe Survey:
School Year 2003-2004.

<http://nces.ed.gov/pubsearch/pubsinfo.asp?pubid=2005369>

- **Site:** For our purposes, school and site are different as follows:
 - *Counted as one school:* Separate location/different principal; same location/same principal
 - *Counted as two schools:* Same location/different principal

Appendix B: Special Notes on Company Profiles

Accelerated Elementary and Secondary Schools (p. 121)

Accelerated Elementary and Secondary Schools use to be named and tracked under Accelerated Learning Laboratory.

Accelerated Elementary and Secondary Schools did respond to our request for information but did not provide information regarding the profitability of the company.

Accelerated Learning Center, Inc. (p. 122)

Accelerated Learning Center, Inc. refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from Arizona Department of Education website on 6/21/05 and the National Center for Education Statistics (Common Core of Data) website on 10/28/05.

Benjamin Franklin Charter School (p. 126)

Benjamin Franklin Charter School refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the National Center for Education Statistics (Common Core of Data) website on 10/28/05, Arizona Department of Education website on 7/7/05, and Greatschools.net on 7/7/05.

Black Star Educational Management (p. 127)

Black Star Educational Management did respond to our request for information but did not provide information regarding the profitability of the company.

Bright Beginnings School, Inc. (p. 128)

Bright Beginnings School, Inc. did respond to our request for information but did not provide information regarding the profitability of the company.

Charter School Administrative Services (p. 35)

Charter School Administrative Services refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the Texas Education Agency and the Michigan Department of Education websites on 7/26/05.

Charter Schools USA (p. 39)

Profile data was compiled from three separate profile responses returned by Charter Schools USA.

Notes: All Notes refer to this reporting period, unless otherwise stated.
Some companies have no associated notes.

Compass High School, Inc. (p. 129)

Compass High School, Inc. refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the National Center for Education Statistics (Common Core of Data) website on 10/28/05 and the Arizona Department of Education website on 9/17/05.

Connections Academy (p. 43)

Connections Academy did respond to our request for information but did not provide information regarding the profitability of the company.

Cornerstone Charter School, Inc. (p. 130)

Cornerstone Charter School, Inc. refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the National Center for Education Statistics (Common Core of Data) website on 10/28/05 and the Arizona Department of Education website on 9/17/05.

Country Gardens Educational Services, LLC (p. 131)

Country Gardens Educational Services, LLC refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from GreatSchools.net and the Arizona Department of Education website on 9/17/05.

CS Partners, LLC (p. 112)

CS Partners, LLC did respond to our request for information but did not provide information regarding the profitability of the company.

Eastpointe High School, Inc. (p. 133)

Eastpointe High School, Inc. did respond to our request for information but did not provide information regarding the profitability of the company.

Educational Impact, Inc. (p. 134)

Educational Impact, Inc. did respond to our request for information but did not provide information regarding the profitability of the company.

Notes: All Notes refer to this reporting period, unless otherwise stated.
Some companies have no associated notes.

Educational Services of America, Inc. (p. 113)

Educational Services of America, Inc. was previously tracked under Ombudsman Educational Services, Ltd.

Educational Services of America, Inc. acquired Ombudsman Educational Services, Ltd. on 9/16/05.

GAR, LLC (p. 135)

GAR, LLC did respond to our request for information but did not provide information regarding the profitability of the company.

Hamadeh Educational Services, LLC (p. 136)

Hamadeh Educational Services, LLC did respond to our request for information but did not provide information regarding the profitability of the company.

Helicon Associates (p. 59)

Helicon Associates did respond to our request for information but did not provide information regarding the profitability of the company.

Heritage Academy, Inc. (p. 137)

Heritage Academy, Inc. refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the National Center for Education Statistics (Common Core of Data) website on 11/1/05, Public School Review website on 9/22/05, and the company website on 9/22/05.

Imagine Schools (p. 63)

Imagine Schools merged with Chancellor Beacon Academies in 6/04. Prior to that Chancellor Beacon Academies formed as a result of a merger of Beacon Education Management and Chancellor Academies in 12/01. This report has tracked these companies under their respective names since 1998.

K12, Inc. (p. 70)

K12, Inc. did respond to our request for information but did not provide information regarding the profitability of the company.

Mosaica Education, Inc. (p. 81)

Mosaica Education, Inc. did respond to our request for information but did not provide information regarding the profitability of the company.

Notes: All Notes refer to this reporting period, unless otherwise stated.
Some companies have no associated notes.

Nobel Learning Communities, Inc. (p. 116)

Nobel Learning Communities, Inc. refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the School District of Philadelphia website on 10/17/05, Greatschools.net on 10/17/05, and National Center for Education Statistics (Common Core of Data) website on 11/3/05.

ORBIS Management Group, LLC (p. 141)

ORBIS Management Group, LLC refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from Michigan Association of Public School Academies website on 10/7/05 and the National Center for Education Statistics (Common Core of Data) website on 10/31/05.

Rose Mangement Group (p. 142)

Rose Mangement Group refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the National Center for Education Statistics (Common Core of Data) website on 11/3/05, the Arizona Department of Education website on 11/1/05, and company/school websites on 11/7/05.

Schoolhouse Services and Staffing, Inc. (p. 143)

Schoolhouse Services and Staffing, Inc. refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from Michigan Association of Public School Academies website on 10/7/05, Greatschools.net on 10/6/05, and the National Center for Education Statistics (Common Core of Data) website on 11/3/05.

Self Development Charter School (p. 144)

Self Development Charter School refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the National Center for Education Statistics (Common Core of Data) website on 11/4/05, Arizona Department of Education website on 11/1/05, and Greatschools.net on 10/6/05.

Smart Schools Management (p. 145)

Smart Schools Management did respond to our request for information but did not provide information regarding the profitability of the company.

Notes: All Notes refer to this reporting period, unless otherwise stated.
Some companies have no associated notes.

Southern Arizona Community Academy, Inc. (p. 146)

Southern Arizona Community Academy, Inc. refused to respond to repeated requests for information regarding profitability status and profile data.

Profile data was compiled from the National Center for Education Statistics (Common Core of Data) website on 11/3/05, Arizona Department of Education website on 11/1/05, Greatschools.net on 10/6/05, and its company webpage on 10/7/05.

Synergy Training Solutions (p. 147)

Synergy Training Solutions did respond to our request for information but did not provide information regarding the profitability of the company.

White Hat Management (p. 105)

White Hat Management did respond to our request for information but did not provide information regarding the profitability of the company.

Notes: All Notes refer to this reporting period, unless otherwise stated.
Some companies have no associated notes.

Appendix C: No Longer Profiled Companies

These companies were once profiled but are no longer being tracked for the reason(s) listed.

Name of Company	Years Profiled	Reason for Exclusion
Advantage Schools	1998-2001	Advantage Schools was acquired by Mosaica Schools in July 2001. Information attributed to the Advantage Schools website at www.advantage-schools.com/news/mosaica%20070201.htm on 07/02/01.
Cambridge Academy East, Inc.	2003-2005	Cambridge Academy East, Inc. representative reported on 01/20/06 it operates as a non-profit company.
Cambridge First Education	1999-2002	Cambridge First Education offers supplementary education by contracting with schools to educate at-risk students. It is not considered an EMO.
Cesar Chavez Learning Community, Inc.	2003-2005	Cesar Chavez Learning Community, Inc representative reported on 01/19/06 operates as a non-profit company.
Designs for Learning, Inc.	2000-2005	Designs for Learning, Inc. representative reports on 01/09/06 that it provides professional services, customized training, and consulting. Therefore, it is not considered an EMO.
EduCare	1998-1999	EduCare is a non-profit organization which operates four charter schools in Michigan. Information received via telephone communication with EduCare on 09/03/02.
Educational Services, Inc.	2002-2005	Educational Services, Inc. reports that it transferred schools Pathways Charter High School and Pathways Preparatory Academy to a non-profit charter named Pathways Charter School, Inc on 07/01/05, per company profile response on 01/04/06.
Future Development Education and Performing Arts Academy	2002-2003	Charter revoked by Charter School Board for failure to pay into Arizona state retirement system. School closed mid-year. "Phoenix school closes doors, students stranded." (2003, Oct. 16) <i>azfamily.com</i> .
General Health Corp.- Arizona Youth Associates	2003-2005	General Health Corp.- Arizona Youth Associates became a non-profit on 11/01/05. As per profile response: "we moved the charter school over and under a non-profit sector of the parent company. This is in response to the federal DOE's interpretation that for-profit status precludes a school from being classified as a 'public school' for the purposes of receiving grant funding."
Ideabanc, Inc.	2002-2005	Company reports it became a non-profit 07/01/05 and changed name to Edventure, Inc., per company profile response on 12/06/05.

Innovative Educational Programs	2001-2002	Innovative Educational Programs offers supplementary education by contracting with schools to educate special education students. It is not considered an EMO. Information received via telephone conversation with Innovative Educational Programs on 12/12/02.
Lake Havasu Charter School	2001-2002	Lake Havasu Charter School changed legal status from for-profit to non-profit on 4 January 2002. Information attributed to the Arizona Department of Education website at www.ade.state.as.us/charterschools/search/SiteList.asp on 06/06/02.
LearnNow	1999-2001	Acquired by Edison Schools in July 2001. Information attributed to the Edison Schools website at www.edisonschools.com/news/news/cfm?ID=88 on 07/02/01.
Malone Management	1998-2001	Malone Management closed the only school they operated in 2000 and do not currently operate any schools.
Mountain Rose	2001-2002	Mountain Rose Academy changed legal status from for-profit to non-profit in 2002. Information received via telephone communication with Daisy Maldonado of Mountain Rose Academy, Inc. on 09/26/02. Note: This company changed their name in 2004 to Rose Management, and has returned to operating as a for-profit entity.
New West Charter School, Inc.	2003-2005	"Now operates as non-profit starting July 1, 2005," per company profile response 12/06/05.
Ombudsman Educational Services, Ltd.	2002-2005	Ombudsman reports it was acquired by Educational Services of America, Inc. effective 09/16/05.
Pitman Resources	2001-2002	Pitman Resources' charter schools were bought by Sequoia Schools. Information received via telephone conversation with Pitman Resources on 12/03/02.
ReInventEd, Inc	2002-2004	Charter revoked by Charter School Board for failure to administer the AIMS HS writing test in February 2003 and failing to provide educational services. Information attributed to the Arizona State Board of Charter Schools website at http://www.asbcs.state.az.us/asbcs on 11/02/04.
Sequoia Charter Schools	2002-2005	Sequoia Charter Schools reported it became a non-profit on 11/01/05.
Shadow Ridge	2002-2003	No longer listed by the Arizona Department of Education as a charter school operator.
TessaracT Group	1998-2001	Company went bankrupt. "Charter school company files for bankruptcy protection." (2000, Oct. 10) <i>Business News</i> .
Tucson Country Day School	2002-2003	Indicated that they are a non-profit company. Information received via fax communication with Tucson Country Day School on 09/24/03.

Appendix D: Methods

Methods to Calculate the National Enrollment Averages

All schools are divided into four school level categories according to the variable “LEVEL03” in the 2003-2004 Common Core of Data (CCD). The school level categories are established according to the lowest and highest grades offered by school. The school level categories are defined as follows:

- Primary: schools with a low grade offered of prekindergarten through grade three (3) and a high grade of prekindergarten through grade eight (8). For the purposes of this study, pre-kindergarten enrollment counts are excluded from all analyses.
- Middle: schools with a low grade offered of four (4) to seven (7) and a high grade ranging from four (4) to nine (9).
- High: schools with a low grade offered of seven (7) to 12 and a higher grade of 12 only.
- Other: all other grade configurations, including ungraded schools.

(Source: <http://nces.ed.gov/ccd/data/txt/psu031alay.txt>)

The national district and charter school enrollment averages are derived from schools in the 2003-2004 CCD, excluding non-operational schools, schools located in rural areas and small towns and schools with a total student count equal to zero. The national average enrollment for each grade is calculated uniquely by school level and

charter school status. All valid student enrollment counts, including zeros, are included in the calculations. This method yields several national enrollment averages for each grade. The multiple grade averages account for variability in student enrollment counts by school level and charter school status. For example, six national average enrollment counts are generated for fourth grade. The average fourth grade enrollment is calculated for primary schools, middle schools, and schools categorized as “other.” Each of the three aforementioned average fourth grade enrollments also is calculated separately for charter and non-charter schools.

The individual national average enrollments for each grade are combined to create unique school level national enrollment averages by grade configuration and charter school status. For example, the national average school level enrollment count for charter schools that serve a K-6 grade configuration is the sum of the individual grade enrollment averages for primary grades Kindergarten through sixth grade in charter schools. The enrollment for each for-profit school is then compared to the respective national school level average enrollment corresponding to the grade configuration served by the respective for-profit school. For example, the enrollment for a for-profit charter school with a grade configuration of K-6 is compared to the sum of the national average charter school enrollment for primary grades K-6. See Appendix D for the national average enrollment counts by grade configuration, school level and charter school status.

Methods for Compiling School Profiles

Compiled each year since 1998-1999, *Profiles of For-Profit Education Management Companies* documents the number of for-profit firms involved in managing publicly-funded schools, identifies the schools they manage, and records the number of

students those schools enroll. The *Profiles* report is compiled from a combination of sources. Internet searches are conducted on the name of each known EMO to identify schools with which the EMOs have contractual relationships. The resulting lists of schools are compared with previous years' lists. When a school previously listed as having a relationship with a particular EMO appears to have dropped off the list, researchers use Internet search engines and news media databases, primarily Lexis-Nexis, to attempt to ascertain the reasons for the change. The information gathered is sent to each EMO to verify its accuracy. Company representatives are encouraged to send additions and corrections to the Education Policy Studies Laboratory for inclusions in the next edition of the *For-Profit Profiles Report*.

The companies profiled represent those that CERU/EPRU researchers could positively identify as for-profit management companies, and are likely to represent only the larger or high-profile companies that exist. It is important to note that while this report labels education management companies as "profitable" and "not profitable," in the case of privately held companies, the designation is based on the companies' self-reports. Unlike publicly traded companies that are required by law to make earnings statements public, privately held companies have no such requirement.

Appendix E: National Average Enrollments

Table 1: Average Enrollments for Average U.S. Charter and District Primary Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
K-2	137.81	246.20
K-3	179.84	330.30
K-4	220.42	414.39
K-5	259.88	497.89
K-6	294.31	572.56
K-7	326.47	641.29
K-8	353.56	708.28
1-6	245.59	492.48
3-7	188.66	395.09

Note: Averages were compiled using the 2003-2004 Common Core of Data.

Table 2: Average Enrollments for Average U.S. Charter and District Middle Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
4-5	115.09	324.84
4-8	372.10	1147.33
5-8	322.10	1000.94
6-8	257.01	822.49
7-9	229.30	781.85
9	55.45	220.88

Note: Averages were compiled using the 2003-2004 Common Core of Data.

Table 3: Average Enrollments for Average U.S. Charter and District High Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
7-10	207.09	795.38
7-11	266.17	1072.51
7-12	322.95	1326.97
8-12	287.50	1254.88
9-10	138.20	663.82
9-12	254.06	1149.05
10-11	124.98	564.82

Note: Averages were compiled using the 2003-2004 Common Core of Data.

Table 4: Average Enrollments for Average U.S. Charter and District Other* Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
K-9	378.68	311.38
K-10	423.70	374.71
K-11	462.99	418.77
K-12	495.05	461.57
4-12	352.92	403.04
6-10	216.04	284.77
6-11	254.33	328.83
6-12	287.39	371.63

Note: Averages were compiled using the 2003-2004 Common Core of Data.

*The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.
