Profiles of For-Profit Education Management Organizations: 2006-2007

Summary

The for-profit education management industry has, based on the available data, entered a period of relative stability. The industry's actual condition, however, is more difficult to determine than ever. This is because companies that dominate the industry are privately held and do not have to provide information to the public that they choose not to share. As a result a large portion of the EMO industry is not subject to independent scrutiny of either financial results or academic performance.

An examination of enrollment patterns reported by large-size education management companies—those that run 10 or more schools—finds that the charter schools they manage typically have larger enrollments than the U.S. charter school average. This pattern is most prevalent among primary schools where large-size EMOs enroll the bulk of their students. These findings suggest a business model that relies on primary education and volume for profits.

The EMO Industry: Background

Education Management Organizations, or EMOs, emerged more than a decade ago in the context of widespread interest in so-called market-based school reform proposals. Wall Street analysts coined the term EMO as an analogue to health maintenance organizations (HMOs), prepaid health insurance plans.

An Education Management Organization, or EMO, is a private firm that manages schools receiving public funds, including district public schools (also called non-charter schools in this report) and charter schools. The EMO-managed schools tracked in this report operate under the same admissions rules as regular public schools and are operated for-profit. Historically, only a small portion of EMOs have been nonprofits. Also not tracked are for-profit private schools, including those that may receive public funds under tuition voucher programs such as those that operate in Milwaukee, Cleveland, or the District of Columbia. (See Appendix A for definitions.)

The theory behind market-based school reform proposals is that, by being forced to compete with other schools, existing public schools will necessarily improve or cease operating. Competition under this theory generally comes in two forms: private schools, with taxpayer-funded tuition vouchers, or charter schools, which operate largely independent of the school district but have been chartered by a public entity or publicly appointed entity so that they qualify for local and state taxpayer funds in the same way as conventional district schools. In practice, voucher schools have remained a small part of the market-reform arena, while charter schools now account for the lion's share of alternatives to traditional public schools.

While faith in market competition as an effective engine of reform provides a general theoretical basis for both EMO-run district (non-charter) and charter schools the specifics of the competition are somewhat different in each instance. Adherents of market-based school reform favor charter schools on the belief that they provide competition that will force existing public schools to improve their outcomes or else be put out of operation. Support for for-profit management of district schools, meanwhile, arises essentially from a belief that private business models are more efficient and effective than non-profit, government-operated institutions. A for-profit company contracted to administer district public schools, it is reasoned, will have incentives (making a profit in the short term, and retaining a profitable contract in the long term) to seek efficiencies and improve student outcomes and achievement. The competition, in this context, takes place not among schools or districts themselves, but among current or potential managers of schools.

Few studies are available to assess the effectiveness of EMOs per se. Large-scale EMO management of district schools has been limited to a handful of companies in and a few urban centers, including Baltimore, Philadelphia, and most recently New Orleans. Studies such as those of the performance of Edison Schools have at best been inconclusive with several recent reports failing to find any improvement in student outcomes either from charter schools in general or from charter schools managed by EMOs in particular. (This issue is further discussed below.)

The number of schools under management, school enrollment and other data reported here are estimates. Several EMO's profiled failed to provide information for this report. As privately held companies, despite receiving millions of dollars in public funding, there is no way to compel them to share information about their operations (see Appendix B).

Findings for 2006-2007

The *Profiles of For-Profit Education Management Organizations: 2006-2007* is the ninth annual *Profiles* report. Profiled EMOs are categorized into three size categories: small (those operating three or fewer schools); medium (those operating four to nine schools); and large (those operating ten or more schools). The *2006-2007 Profiles* report identifies a total of 23 companies categorized as large- or medium-size, the same number as identified in the *2005-2006 Profiles*. EMOs now operate in 31 states, up two from last year, however. One firm was excluded from the current *Profiles* because it became a not-for-profit organization (see Appendix C).¹ Two firms changed size category in the *2006-2007 Profiles* report (see Large- and Medium-Size EMO section below).

In 2006-2007, large- and medium-size EMOs managed a total of 457² schools, down from 480 in the *2005-2006 Profiles*. Edison Schools lost the greatest net number of school contracts (four) among large- and medium-size EMOs.

The *2006-2007 Profiles* report omits data about and profiles of small-size EMOs and the corresponding lists of the schools they operate. This decision was made for two reasons. First, small companies as a group appear to represent a relatively minor segment of the industry. For instance, for this edition of the *Profiles* researchers counted 25 small-size companies managing a total of 36 schools that enroll a total of 10,823 students. Thus, although small-size EMOs represent more than half of the total number of companies surveyed for this year's report, schools run by small-size EMOs account for only 4.7% of the total enrollment in EMO-managed schools overall. Their apparently minimal footprint in the industry makes it unlikely that the omission of small EMOs from this year's analyses will materially affect the overall conclusions drawn. Second, as a consequence of smaller size and influence, the tracking of small EMOs over time is particularly difficult, with some new firms surfacing while other, formerly profiled firms could not be verified for the current *Profiles*. The volatility of the data available about small-size EMOs reduced our confidence in the completeness of data and thus the decision was made to eliminate from this report companies that manage fewer than four schools.

Large- and Medium-Size EMOs

The *2006-2007 Profiles* report profiles 23 EMOs (14 large- and 9 medium-size). Since last year, Pinnacle Education, formerly a medium-sized firm moved into the large category with the addition of one school and Benjamin Franklin Charter School moved from the small- to medium-size category also with the addition of one school. In total, the large- and medium-size EMOs manage a combination of charter, district, and "virtual" schools with a total enrollment of 218,675 students. Table 1 is the only table that includes virtual school data.

Table 1 presents trend data on the number of large- and medium-size EMOs, the number of schools they operate, and student enrollment.³

Table 1: Summary Data for Large- and Medium-Size EMOs, by Year

School Year	Number of Large- and Medium-Size Companies Profiled	Estimated Number of Schools Managed by Profiled Companies	Estimated Number of Students Enrolled by Profiled Companies*	Number of States in Which Profiled Companies Operate**
2002-2003	18	375	180,632	25
2003-2004	21	424	190,335	29
2004-2005	24	483	227,740	25
2005-2006	23	480	225,466	29
2006-2007	23	457***	218,675	31

Note: Numbers are estimated because some EMOs did not respond to requests for data (see Appendix B). Small firms, included in previous years' versions of this table, have been excluded from the current report because the data associated with them are deemed less reliable. Years prior to 2002-2003 have been omitted because those *Profiles* reports did not include the "medium-size" category, and did not include complete enrollment data.

* Enrollment data were not tracked in the first three years of the *Profiles* report.

** Includes the District of Columbia.

*** This does not include eight Mosaica schools for which the company did not provide enrollment information.

EMOs and Charter Schools

The U.S. charter school data provided here are derived from the U.S. Department of Education's Common Core of Data (CCD). EMO-managed charter school data are derived from company self-reports. The CCD data lag the EMO-reported data by two years. The most recent CCD data (and the data used in the report) are for the 2004-2005 school year. The EMO school and student enrollment counts are from 2006-2007.

In an effort to make "apples to apples" comparisons between EMO-managed charter schools and U.S. charter schools in general, the charter school universe is defined as charter schools classified in the CCD database as operating in large towns or larger population centers.⁴ As a result, the number of U.S. charter schools reported here is not the same as the total number reported in the CCD database.⁵ Excluding charter schools in lesser-populated areas creates conservative and more uniform comparisons between the average U.S. charter school enrollment estimates and the enrollments of EMO-managed charter schools. This is true for two reasons. Schools in less populated areas are generally smaller than schools in larger population centers and EMOs most often operate

in larger population centers. The exclusion of these smaller schools creates larger average U.S. charter school enrollment estimates than if the small schools were included. Schools in the CCD data base listed as “scheduled to open-not open yet” and those listed as “temporarily closed” are excluded from the analysis for obvious reasons.

According to the most recent complete Common Core of Data (CCD) data set (2004-2005) a total of 615,147 students are enrolled in 2,475 U.S. charter schools. Excluding so-called virtual schools, the *2006-2007 Profiles* report estimates that 151,471 students are enrolled in 352 charter schools managed by 12 large- and 9 medium-size companies. (Two of the 14 large-size companies profiled are not included in these calculations as they manage only virtual schools.) These 21 large- and medium-size companies, therefore, manage 14%, or almost 1 in 7, of the charter schools in the nation (Table 2).

The data in Table 2 suggest that the percentage of charter schools managed by large- and medium-size EMOs has declined slightly from 2005-2006. The apparent decline in the percentage of charter schools managed by EMOs is potentially important because it is possible that Charter Management Organizations (CMOs) are displacing for-profit EMOs as managers of charter schools. The recent growth of CMOs is in large measure due to the promotion and financial backing of foundations. CMO proponents characterize their efforts as an attempt to increase the number of charter schools and address concerns about charter school quality and the sustainability of the charter school reform.⁶ In order to systematically monitor this phenomenon, the *2007-2008 Profiles* report will include profiles of CMOs.

Although our data suggest that the growth of for-profit EMOs has slowed, one should also be aware that some of the large- and medium-size EMOs have been diversifying and expanding into new service areas such as the provision of supplemental education services. In addition, EMOs, such as Edison, have also packaged and sold or leased their curricula, accountability, and in-service training systems. Thus a slow down in EMO growth in schools under management may reflect a strategic change of direction for some EMOs.

Table 2: Number and Percentage of U.S. Charter Schools Managed by Large- and Medium-Size EMOs

	All School Levels	
	2005-2006	2006-2007
Number of U.S. Charter Schools*	2,319	2,475
<i>Large-Size EMOs</i>		
Estimated Number of EMO Managed U.S. Charter Schools	323	296**
Estimated Percentage of EMO Managed U.S. Charter Schools	14%	12%
<i>Medium-Size EMOs</i>		
Estimated Number of EMO Managed U.S. Charter Schools	55	56
Estimated Percentage of EMO Managed U.S. Charter Schools	2%	2%
<i>Combined Large- and Medium-Size EMOs</i>		
Estimated Combined Total Number of EMO Managed U.S. Charter Schools	378	352**
Estimated Combined Total Percentage of EMO Managed U.S. Charter Schools	16%	14%

Note: Virtual schools are not included in these data.

Percentages only reported in whole numbers.

Numbers and percentages are estimated because some EMOs did not respond to requests for data (see Appendix B)

*The number of U.S. charter schools was taken from the U.S. Department of Education’s Common Core of Data, which lag two years behind the year of their release. As set forth in this Introduction, the number of charter schools listed excludes virtual schools, non-operational schools, and schools in sparsely populated areas.⁷

** This does not include eight Mosaica schools for which the company did not provide enrollment information.

Table 3: Number and Percentage of U.S. Charter Schools Managed by Large- and Medium-Size EMOs, by School Level

	Primary		Middle		High		Other*	
	2005-2006	2006-2007	2005-2006	2006-2007	2005-2006	2006-2007	2005-2006	2006-2007
Number of U.S Charter Schools**	1,054	1,145	221	240	542	579	502	511
<i>Large-Size EMOs</i>								
Estimated Number of EMO Managed U.S. Charter Schools	208	187	12	7	61	66	42	36
Estimated Percentage of EMO Managed U.S. Charter Schools	20%	16%	5%	3%	11%	11%	8%	7%
<i>Medium-Size EMOs</i>								
Estimated Number of EMO Managed U.S. Charter Schools	24	25	1	1	19	8	10	22
Estimated Percentage of EMO Managed U.S. Charter Schools	2%	2%	1%	0%	4%	1%	2%	4%
<i>Combined Large- and Medium-Size EMOs</i>								
Estimated Combined Total Number of EMO Managed U.S. Charter Schools	232	212	13	8	80	74	52	58
Estimated Combined Total Percentage of EMO Managed U.S. Charter Schools	22%	19%	6%	3%	15%	13%	10%	11%

Note: Virtual schools are not included in these data. Percentages only reported in whole numbers. Does not include eight Mosaica schools (see Endnote 2).

Numbers and percentages are estimated because some EMOs did not respond to requests for data (see Appendix B).

*The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

**The number of U.S. charter schools was taken from the U.S. Department of Education’s Common Core of Data, which lag two years behind the year of their release. As set forth in this Introduction, the number of charter schools listed excludes virtual schools, non-operational schools, and schools in sparsely populated areas (see Endnote 7). The numbers of charter schools managed by EMOs are derived from the research for this *Profiles* report.

Table 4: Enrollment in U.S. Charter Schools and Those Managed by Large- and Medium-Size EMOs, All Grades K-12

	2004-2005	2005-2006	2006-2007
Total Charter School Enrollment*	565,648	682,050	615,147
<i>Large-Size EMOs</i>			
Estimated EMO Managed U.S. Charter School Enrollment	148,031	143,407	131,379
Estimated Percentage of EMO Managed U.S. Charter School Enrollment	26%	21%	21%
<i>Combined Large- and Medium-Size EMOs</i>			
Estimated Combined Total EMO Managed U.S. Charter School Enrollment	162,719	159,377	151,471
Estimated Combined Total Percentage of EMO Managed U.S. Charter School Enrollment	29%	23%	25%

Note: Virtual schools are not included in these data. Percentages only reported in whole numbers. Numbers and percentages are estimated because some EMOs did not respond to requests for data (see Appendix B).

*The number of U.S. charter schools was taken from the U.S. Department of Education’s Common Core of Data, which lag two years behind the year of their release. As set forth in this Introduction, the U.S. charter schools counted excludes virtual schools, non-operational schools, and schools in sparsely populated areas (see Endnote 7). The numbers of charter schools managed by EMOs are derived from the research for this *Profiles* report.

The data in Table 4 indicate that charter schools run by large- and medium-size EMOs enrolled about 25 percent of the nation’s charter-school students, a slightly larger percentage than last year but smaller than 2003-2004.

The reduction in the 2006-2007 *Profiles* EMO enrollment figures in part reflects the elimination of one large-size company, Imagine Schools, from the list. Imagine, which accounted for 29 charter schools with an enrollment of 15,215 students, was converted to a not-for-profit organization in August 2005.⁸ The 2006-2007 enrollment figures also reflect the net loss of four charter school management contracts for another company, Edison Schools.

Enrollment Patterns and Average Charter School Size

Almost two-thirds of charter schools managed by large-size EMOs have enrollments greater than the U.S. charter school average enrollment. The data show that this trend is mostly concentrated at the Primary level, as shown in Table 5.

Table 5: Enrollment Comparisons by School Level: Charter Schools Managed by Large-Size EMOs vs. U.S. Charter Schools

School level	Comparison to Average Enrollment of U.S. Charter Schools	Estimated Number of EMO Charter Schools	Estimated Percentage of EMO Charter Schools	Estimated Percentage of EMO Charter Students
Primary	Less than	50 (of 187)	27%	11%
	Greater than*	137 (of 187)	73%	89%
Middle	Less than	3 (of 7)	43%	12%
	Greater than*	4 (of 7)	57%	88%
High	Less than	32 (of 66)	48%	24%
	Greater than*	34 (of 66)	52%	76%
Other**	Less than	25 (of 36)	69%	29%
	Greater than*	11 (of 36)	31%	71%
All	Less than	110 (296)	37%	15%
	Greater than*	186 (296)	63%	85%

Note: Virtual schools are not included in these data. Percentages only reported as whole numbers. Does not include eight Mosaica schools (see Endnote 2). Numbers and percentages are estimated because some EMOs did not respond to requests for data (see Appendix B).

* “Greater than” includes schools with enrollments exactly equal to the national average. Very few schools actually have enrollments equal to the national averages.

**The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

Large-size EMOs enroll 131,379 charter school students. 91,794 are primary, 2,316 are middle, 21,277, are high, and 15,992 are other. These numbers are driven by a relatively few large-size EMOs. Also, larger than average enrollments in large-size EMO-run charter schools are concentrated in the primary grades. Eighty-nine percent of primary students in schools run by large-size EMOs are in schools with enrollments above the national charter school average enrollment at the primary level. It appears that the business model suggested in the *2005-2006 Profiles* report⁹ seems to be holding: large-size EMOs are focused on relatively high enrollments at the primary level in order to deliver profits. It is important to further investigate the implications of large-size EMOs focusing on high enrollments at the primary school level.

Tables 6 and 7 display school enrollment comparisons by company.

Table 6: Overall School Size Comparisons by Company: Charter Schools Managed by Large-Size EMOs vs. U.S. Charter School Average Enrollment

EMO	Number of EMO Managed Charter Schools Exceeding U.S. Charter School Average Enrollment	Percentage of EMO Managed Charter Schools Exceeding U.S. Charter School Average Enrollment	Percentage of Students Enrolled in EMO Managed Charter Schools Exceeding U.S. Charter School Average Enrollment
Charter School Administrative Services*	10	67%	88%
Charter Schools USA	15	100%	100%
Edison Schools	33	89%	96%
Helicon Associates*	5	36%	71%

	Leona Group, LLC, The	2	29%	44%
	Mosaica Education, Inc.*	1	33%	61%

Note: Virtual schools are not included in these data. Percentages only reported as whole numbers. Does not include eight Mosaica schools (see Endnote 2).

* Numbers and percentages are estimated because this EMO did not respond to requests for data (see Appendix B).

**The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

Factors shaping the industry

Taken together, the data collected on EMOs for 2006-2007 suggest that their growth may be leveling off and that the industry is relatively stable. With a few exceptions most reporting EMOs have neither added nor dropped schools. Enrollments similarly have remained relatively constant.

Edison Schools, the only company in the Profiles that manages more district schools than charter schools, is the most in flux, adding six schools and dropping 10. The greatest growth is found in the virtual-school segment, dominated by K12, Inc. and Connections Academy, both of which are discussed later in this report.

In one respect Edison is something of an anomaly in the industry because, as already noted, the bulk of its contracts are not with charter schools. Indeed, while Edison has often been seen as the archetypal EMO, that designation may no longer apply very well as the industry has shifted its focus to charter schools.

Among EMOs whose business largely or exclusively focuses on managing charter schools, the largest is National Heritage Academies, which enrolls more than 30,000 students in 53 schools. A privately held company based in Michigan, it was founded in 1995 and now operates schools in five states. Unlike Edison, it has never been publicly held, and, as a consequence, has never garnered the degree of public attention that Edison has.

Other large-size EMOs, in order of the number of charter schools they manage, are The Leona Group (45); Edison (37¹⁰); White Hat Management (36¹¹); and Mosaica Education with 34¹² charter schools. Together these five firms manage 205 charter schools – more than two-thirds of the 296 charter schools operated by the 12 large-size (10 or more schools) EMOs and more than half of the 352 charter schools managed by all 21 firms in this edition of the Profiles. These five firms enroll a total of 97,286 charter school students, almost two-thirds of the 151,471 students in all charter schools operated by the 21 large- and medium-size EMOs. (These numbers do not include any virtual schools or the two companies that only have virtual schools.)

Some EMO founders have operated in relative obscurity, but others have had relatively high profiles over the years. National Heritage Academies was founded by J.C. Huizenga, owner of a half-dozen manufacturing companies.¹³ White Hat Management was founded and is run by David Brennan, an Ohio industrialist. Edison Schools was founded by Christopher Whittle, a publishing and media entrepreneur who earlier created Channel One, which broadcasts news and advertising in schools under an arrangement that gives schools television equipment in return for required viewing of its broadcast material. Whittle later sold Channel One; its current owners, Primedia, announced the sale of the business in April of 2007.¹⁴ Whittle originally founded Edison to operate private schools, and after the failure of private school voucher plans to achieve significant traction nationally, redirected Edison to the management of public district schools and public charter schools.

All five firms are privately held and, therefore, as already noted, are largely free of any requirement to provide the public with financial or other information. Additionally, the companies' practices vary with regard to outside scrutiny. National Heritage, Leona, and Edison all responded to the authors of this report by providing updated information on the names, locations, and enrollments of the schools they operate, listing both new schools and schools they no longer operated. Mosaica and White Hat did not respond to repeated telephone and email inquiries.

Of the five firms, White Hat arguably has the most visible paper trail, owing to the outspokenness of its founder, David Brennan, his activism in Ohio politics, and media attention paid to the firm in its home state. White Hat has been the subject of repeated media scrutiny going back as far as 1999. In 2006, the *Cleveland Plain Dealer* spotlighted the company again in a group of articles that asked, in the words of its opening headline, "Who's profiting from Ohio's charter schools?"¹⁵ Citing state records, the lead article in the series asserted that White Hat's Hope Academy schools, targeted to high school dropouts, "have fared even worse" than the rest of the state's charter schools, where "with some notable exceptions, the results so far have been dismal."¹⁶ The reportedly poor performance of White Hat is particularly striking in light of the role the company and Brennan played in the 1990s in helping to formulate the Ohio charter school law. The *Cleveland Plain Dealer* article described Brennan as having "played a major role in pushing Ohio's school choice legislation through politically polarized Columbus in the mid-1990s with waves of campaign cash."¹⁷

The *Cleveland Plain Dealer* reported that in 2005 that White Hat garnered nearly \$109 million in state dollars and "millions more" in federal grants.¹⁸ The newspaper calculated that over the decade-long life of the state's charter school program, White Hat schools had collected \$350 million in Ohio State tax dollars, or 25% of what the state had spent on charter schools altogether.¹⁹

Notwithstanding its role as a recipient of public funds, White Hat appears to be extraordinarily secretive about aspects of its operations. Representatives of the company did not respond to four separate inquiries during the preparation of this edition of the Profiles seeking verification, and correction if necessary, of the information researchers for this report had collected on the company.

The company's financial data have only recently begun to be available in state records. Researchers for the *Columbus Dispatch* reviewed state audits of 17 of the company's Ohio schools in 2006 and concluded that "White Hat made \$15.4 million in combined profits and management fees" in 2005.²⁰ Additionally, White Hat was one of four organizations criticized by the Ohio Federation of Teachers for failing to provide information about teacher contracts in response to a public information request commissioned by the teachers union. (The others were National Heritage, Leona, and Summit Academy Management of Akron, a non-profit organization that is not included in this report.)²¹

Supporters of the role of for-profit EMOs as managers of charter schools have argued that such companies remain accountable to individual parents—who, it is reasoned, can choose to send or not send their children to particular schools—and to the board of the non-profit charter schools that hire the EMOs to operate them. Yet, once again in Ohio, even those assumptions are being called into question. Very late in 2006, outgoing Gov. Robert Taft signed into law a provision that gives EMOs the right to appeal terminations or non-renewals of their management contracts to run a charter school. If an EMO’s appeal is granted by the charter school’s sponsor agency, the law requires the sponsor to fire the board that sought to terminate the EMO’s contract, and requires the EMO to appoint a new board for the school. Board members at 19 schools managed by White Hat sued in early 2007 to overturn the new law, which could prevent them from ending their schools’ relationship with the company. A lawyer for the plaintiffs told the *Akron Beacon Journal* in early 2007 that under the new law, “my clients are losing their rights to run these schools.”²²

Virtual Schools

Virtual schools have continued to expand. Two firms dominate the industry: Connections Academy and K12, Inc. Both generally form partnerships with existing school districts to create on-line schools serving primarily students who learn from home.

Virtual schools, depending on the state, operate under two different governing frameworks. Most are established under state charter school laws. Some, however, are established under other arrangements—either directly under control of a school district, or else provided for under state enabling legislation that is separate from charter school laws. K12’s 21 schools include 17 established under charter regulations and 4 that are not. Connections Academy’s 12 schools include 8 charter schools and 4 non-charter schools.

K12 added seven new virtual schools for which it held management contracts in 2006. The company also discontinued providing management services to one school, the Pennsylvania Virtual Charter School, but reports that it continues to supply complete curriculum, materials and support to the school. Additionally the firm says it “provides curriculum, materials and support (but without management services) to many other schools and school districts across the country for virtual school programs that serve thousands of students.”²³

K12 was launched by Knowledge Universe, a holding company founded by Lowell and Michael Milken and Lawrence Ellison.²⁴ (Michael Milken was convicted of insider trading violations after pioneering the use of junk bonds to restructure corporations in the 1980s. Ellison is a founder of software manufacturer Oracle Inc.)²⁵ K12’s web site lists its founding year as 1999,²⁶ but the company did not publicly announce its plans until February 2001.²⁷ The current relationship between K12 and Knowledge Universe, which essentially is a capitol incubator, is not clear. K12’s founder and chairman, Ron Packard, is identified on the K12 web site as “previously a vice

president of Knowledge Universe,” but otherwise the K12 web site has no references to the company that launched it.²⁸ Meanwhile, even though Knowledge Universe has a web domain, it leads only to a completely blank page.²⁹

Connections Academy, meanwhile, added no new schools in 2006, based on the company’s response to its profile, while discontinuing three schools whose students, a company official said, were allowed to transfer to other Connections programs.³⁰

The EMO Record

While individual EMOs have offered accounts of their own success,³¹ little in the way of additional, independently collected and analyzed data on the academic performance of EMO-run schools appeared in 2006. A study for the U.S. Department of Education by Educational Testing Service found that when corrected for demographic factors such as race and socioeconomic status, fourth graders in charter schools did less well than their peers in conventional district schools in reading or math, but that study did not specifically examine differences if any among schools run by for-profit firms and other schools.³²

In early 2007, two separate studies attempted to gauge the impact of for-profit management of elementary and middle public schools in Philadelphia and produced conflicting findings. These studies examined math and reading test scores of students in restructured, low-achieving Philadelphia public schools, and included comparisons between students attending schools managed by one of several private providers, and students attending schools managed by the School District of Philadelphia. The first study, authored by researchers for the RAND Corporation, concluded that private management had no impact on math or reading achievement, while district management had a positive effect on math achievement but none on reading.³³ The second, by Paul Peterson of the Harvard University Program on Education Policy and Governance, found private management had a positive effect on the performance of lower-scoring students in math and reading, while district management had no measurable effect.³⁴ An independent review of both studies found each of them flawed and concluded that neither was adequate to draw definitive conclusions on the impact of private management of public schools.³⁵

Continued Policy Questions

Past editions of the Profiles report have raised questions about relationships between EMOs and school districts and between EMOs and public officials who potentially stand to regulate them. A more overarching issue, however, continues to be secrecy and accountability. States are not consistent one from another in what they require from such firms. Information regarding the operation and internal working of EMOs, however, remains proprietary with few requirements for disclosure. As already observed, particularly in the case of White Hat Management in Ohio, the continued lack

of transparency in private companies that receive public funds to operate public schools remains a matter of concern.

Data Sources

Compiled each year since 1998-1999, the *Profiles* report documents the number of for-profit firms involved in managing publicly funded schools, identifies the schools they manage, and records the number of students those schools enroll.

The *Profiles* report is compiled from a combination of sources. Internet searches are conducted on the name of each known EMO to identify schools with which the EMOs have contractual relationships. The resulting lists of schools are compared with previous years' lists. When a school previously listed as having a relationship with a particular EMO appears to have dropped off the list, researchers use Internet search engines and news media databases, primarily Lexis-Nexis, to ascertain the reasons for the change. Each EMO is provided with the information that has been compiled about it and is given an opportunity to verify the accuracy of the information and correct any errors in that information.

Using the Profiles

The companies profiled represent those that Commercialism in Education Research Unit and Education Policy Research Unit researchers could identify as for-profit management companies, and are likely to represent only the larger or higher-profile companies in operation. As explained above, small-size companies (those that manage three or fewer schools) are no longer included in the *Profiles* report. Therefore, a substantial number of EMOs that operate a small number of schools may exist that are not included in the *Profiles* report.

The appendices contain important information that will be helpful in using the *Profiles* report. Here is a list of the appendices and a brief description of each:

- **Appendix A** contains definitions of terms and notes that will be helpful in understanding the company summaries and profiles.
- **Appendix B** contains notes on companies that failed to respond to requests for information.
- **Appendix C** contains a list of companies that are no longer profiled and the reason(s) why.
- **Appendix D** contains the methods for calculating national average enrollments.

- **Appendix E** contains national average enrollment counts by grade configuration, school level, and charter school status.
- **Appendix F** contains enrollment comparisons of EMO-managed district schools vs. national district school averages and comparison of EMO-managed charter schools vs. national district school averages.
- **Appendix G** contains a list of small-size companies.

Notes and References

- ¹ The excluded large-size EMO is Imagine Schools. The reason for exclusion is in Appendix C.
- ² This does not include eight Mosaica schools for which the company did not provide enrollment information.
- ³ The reader interested in comparing the school counts and enrollment trends of EMOs back to 1999-2000 should be aware of how the Profiles report has changed over the years. Since 1999-2000, Profiles reports have tracked the number of EMOs and the number of schools they manage. Since 2001-2002 Profiles reports have tracked overall enrollments in EMO-managed schools. Until 2002-2003 EMO's were classified as either large (operating 10 or more schools) or small (operating fewer than 10 schools). In 2002-2003 the medium-size (operating 5-9 schools) category was created.
- ⁴ This report only includes data from categories 1-5 of the 8 CCD locale categories. The categories are: **(1)** Large city: A principal city of a metropolitan core based statistical area (CBSA), with the city having a population greater than or equal to 250,000; **(2)** Midsize city: A principal city of a metropolitan CBSA, with the city having a population less than 250,000; **(3)** Urban fringe of a large city: Any incorporated place, census-designated place, or nonplace territory within a metropolitan CBSA of a large city and defined as urban by the Census Bureau; **(4)** Urban fringe of a midsize city: Any incorporated place, Census-designated place, or nonplace territory within a CBSA of a midsize city and defined as urban by the Census Bureau; **(5)** Large town: An incorporated place or census-designated place with a population greater than or equal to 25,000 and located outside a metropolitan CBSA or inside a micropolitan CBSA; **(6)** Small town: An incorporated place or census-designated place with a population less than 25,000 and greater than or equal to 2,500 and located outside a metropolitan CBSA or inside a micropolitan CBSA; **(7)** Rural, outside CBSA: Any incorporated place, census-designated place, or nonplace territory not within a metropolitan CBSA or within a micropolitan CBSA and defined as rural by the Census Bureau; and **(8)** Rural, inside CBSA: Any incorporated place, census-designated place, or nonplace territory within a metropolitan CBSA and defined as rural by the Census Bureau.
- ⁵ The National Alliance for Public Charter Schools reports 1,144,758 students enrolled in 4,046 charter schools. Meanwhile, the Center for Education Reform, which favors charter schools, opposes most government regulation of them, and regards the for-profit school-management industry favorably, reports 1,156,874 students in the US enrolled in 3,940 charter schools. Neither organization offers precise citations for its data in the documents reporting them. Todd Ziebarth, who assembled the data for the NAPCS, reported in an email communication with EPSL that his data came "directly from state departments of education in April 2007" and was collected through "e-mails, phone calls, and web sites." CER states its numbers were "compiled in part through state departments of education and charter school resource centers."

PROFILES OF FOR-PROFIT EDUCATION MANAGEMENT ORGANIZATIONS: 2006-2007

Appendices

Appendix A: Reader's Guide

Key to Tables

N/A: Not applicable. Company was not tracked during this reporting period.

U: Unknown. Company was tracked but data were not available or were unreported.

0: Zero. None reported.

Miscellaneous Notes

Large company pie chart categories are based on Common Core of Data defined instructional levels.

Information for no-longer-profiled, small-EMOs schools was not tracked.

Notes in Appendix B indicate companies that did not respond to repeated requests for company and school data. If there are no notes for a specific company, assume that an updated company profile was returned as a part of this project.

Definition of Terms

- **Charter School:** Charter schools provide free elementary/secondary education under a charter granted by legislatively recognized public entity or publicly appointed entity so that they qualify for local and state taxpayer funds in the same way as conventional district schools.
- **Virtual School:** An internet-based curriculum outside of the conventional brick-and-mortar setting of traditional public and charter schools.
- **Education Management Organization (EMO):** An EMO is for-profit, manages at least one school that receives public funds, and operates the public school(s) it manages under the same admissions rules as regular public schools.
- **Instructional Levels:** Instructional levels are calculated from the lowest and highest grades for which students are enrolled in a school.
- **Primary:** schools with a low grade offered of prekindergarten through grade three (3) and a high grade of prekindergarten through grade eight (8). For the purposes of this study, pre-kindergarten enrollment counts are excluded from all analyses.
- **Middle:** schools with a low grade offered of four (4) to seven (7) and a high grade ranging from four (4) to nine (9).
- **High:** schools with a low grade offered of seven (7) to 12 and a higher grade of 12 only.
- **Other:** all other grade configurations, including ungraded schools.

Appendix B: Special Notes on Company Profiles

This year the following firms failed to respond to repeated requests for enrollment and other information.

Charter School Administrative Services

Charter School Administrative Services did not provide information about itself or its schools. The company was contacted on 1/3/07, 1/9/07, and 2/20/07.

Previous profile data was compiled from the Texas Education Agency and the Michigan Department of Education websites on 7/26/05.

Educational Services of America, Inc.

Educational Services of America did not provide information about itself or its schools. The company was contacted twice on 2/22/07.

Educational Services of America, Inc. was previously tracked under Ombudsman Educational Services, Ltd. Educational Services of America, Inc. acquired Ombudsman Educational Services, Ltd. on 9/16/05.

Excel Education Centers, Inc.

Excel Education Centers Inc. did not provide information about itself or its schools. The company was contacted on 2/22/07.

Previous profile data was compiled from the Great Schools website on 10/25/06.

Helicon Associates

Helicon did not provide information about itself or its schools. The company was contacted on 1/3/07 and 2/20/07.

Previous profile data was verified by Helicon, except for profitability status, on 12/7/05.

Mosaica Education, Inc.

Mosaica did not provide information about itself or its schools. The company was contacted on 1/25/07 and 2/21/07.

Previous profile data was verified by Mosaica, except for profitability status, on 12/23/05.

All Notes refer to this reporting period, unless otherwise stated.
Some companies have no associated notes.

Nobel Learning Communities, Inc.

Nobel did not provide information about itself or its schools. The company was contacted twice on 2/22/07.

Previous profile data was compiled from the School District of Philadelphia website on 10/17/05, Great Schools website on 10/17/05, and the National Center for Education Statistics (Common Core of Data) website on 11/3/05.

Planagement Group, L.P., The

Planagement did not provide information about itself or its schools. The company was contacted on 1/25/07 and 2/20/07.

Previous profile data was verified by Planagement on 12/19/05.

Victory Schools, Inc.

Victory Schools did not provide information about itself or its schools. The company was contacted on 1/25/07 and 2/20/07.

Previous profile data was verified by Victory Schools on 12/21/05.

White Hat Management

White Hat Management did not provide information about itself or its schools. The company was contacted on 1/25/07 and 2/20/07.

Previous profile data was verified by White Hat Management, except for profitability status, on 1/13/06.

All Notes refer to this reporting period, unless otherwise stated.
Some companies have no associated notes.

Appendix C: No Longer Profiled Companies

These companies were once profiled but are no longer being tracked for the reason(s) listed.

Name of Company	Years Profiled	Reason for Exclusion
Accelerated Elementary and Secondary Schools	2004-2005 to 2005-2006	Accelerated Elementary and Secondary Schools became non-profit as of 7/19/2005.
Advantage Schools	1999-2000 to 2000-2001	Advantage Schools was acquired by Mosaica Schools in July 2001. Information attributed to the Advantage Schools website at www.advantage-schools.com/news/mosaica%20070201.htm on 07/02/01.
Cambridge Academy East, Inc.	2003-2004 to 2004-2005	Cambridge Academy East, Inc. representative reported on 01/20/06 it operates as a non-profit company.
Cesar Chavez Middle Schools	2003-2004 to 2004-2005	Cesar Chavez Learning Community, Inc representative reported on 01/19/06 it operates as a non-profit company.
Crawford First Education	2000-2001 to 2001-2002	Crawford First Education offers supplementary education by contracting with schools to educate at-risk students. It is not considered an EMO.
Designs for Learning, Inc.	2000-2001 to 2004-2005	Designs for Learning, Inc. representative reported on 01/09/06 that it provides professional services, customized training, and consulting. Therefore, it is not considered an EMO.
Educational Services, Inc.	2002-2003 to 2004-2005	Educational Services, Inc. reports that it transferred schools Pathways Charter High School and Pathways Preparatory Academy to a non-profit charter named Pathways Charter School, Inc. on 07/01/05, per company profile response on 01/04/06.
Future Development Education and Performing Arts Academy	2003-2004	Charter revoked by Charter School Board for failure to pay into Arizona state retirement system. School closed mid-year. "Phoenix school closes doors, students stranded." (2003, Oct. 16) azfamily.com .
General Health Corp.- Arizona Youth Associates	2003-2004 to 2004-2005	General Health Corp.- Arizona Youth Associates became a non-profit on 11/01/05. As per profile response: "we moved the charter school over and under a non-profit sector of the parent company. This is in response to the federal DOE's interpretation that for-profit status precludes a school from being classified as a 'public school' for the purposes of receiving grant funding."
Ideabanc, Inc.	2002-2003 to 2004-2005	Company reports it became a non-profit on 07/01/05 and changed name to Edventure, Inc., per company profile response on 12/06/05.

Name of Company	Years Profiled	Reason for Exclusion
Imagine Schools	2000-2001 to 2005-2006	Imagine Schools changed to a non-profit organization in September, 2005.
Innovative Educational Programs	2002-2003	Innovative Educational Programs offers supplementary education by contracting with schools to educate special education students. It is not considered an EMO. Information received via telephone conversation with Innovative Educational Programs on 12/12/02.
Lake Havasu Charter School, Inc.	2002-2003	Lake Havasu Charter School changed legal status from for-profit to non-profit on 1/4/2002. Information attributed to the Arizona Department of Education website at www.ade.state.as.us/charterschools/search/SiteList.asp on 06/06/02.
LearnNow	2001-2002	Acquired by Edison Schools in July 2001. Information attributed to the Edison Schools website at www.edisonschools.com/news/news/cfm?ID=88 on 07/02/01.
Malone Management	1999-2000 to 2000-2001	Malone Management closed the only school it operated in 2000 and does not currently operate any schools.
Mountain Rose	2002-2003	Mountain Rose Academy changed legal status from for-profit to non-profit in 2002. Information received via telephone communication with Daisy Maldonado of Mountain Rose Academy, Inc. on 09/26/02. Note: This company changed their name in 2004 to Rose Management, and has returned to operating as a for-profit entity.
New West Charter School, Inc.	2003-2004 to 2004-2005	"Now operates as non-profit starting July 1, 2005," per company profile response 12/06/05.
Ombudsman Educational Services, Ltd.	2002-2003 to 2004-2005	Ombudsman reports it was acquired by Educational Services of America, Inc. effective 09/16/05.
ORBIS Management Group, LLC	2002-2003 to 2005-2006	In a telephone interview 2/23/2007, a spokeswoman at Orbis Management Group said the company's work with Walden Green Day School was limited to managing its payroll account and related services. It therefore does not meet EMO criteria.
Pitman Resources	2002-2003	Pitman Resources' charter schools were bought by Sequoia Schools. Information received via telephone conversation with Pitman Resources on 12/03/02.
ReInventEd, Inc.	2003-2004	Charter revoked by Charter School Board for failure to administer the AIMS HS writing test in February 2003 and failing to provide educational services. Information attributed to the Arizona State Board of Charter Schools website at http://www.asbcs.state.az.us/asbcs on 11/02/04.

Profiles Report: Appendix C

Name of Company	Years Profiled	Reason for Exclusion
Sequoia Charter Schools	2002-2003 to 2004-2005	Sequoia Charter Schools reported it became non-profit on 11/01/05.
Shadow Ridge	2003-2004	No longer listed by the Arizona Department of Education as a charter school operator.
TessaracT Group	1999-2000 to 2000-2001	Company went bankrupt. "Charter school company files for bankruptcy protection." (2000, Oct. 10) Business News.
Tucson Country Day School	2003-2004	Indicated that they are a non-profit company. Information received via fax communication with Tucson Country Day School on 09/24/03.

Appendix D: Methods

Methods to Calculate the National Enrollment Averages

All schools are divided into four school level categories according to the variable “LEVEL04” in the 2004-2005 Common Core of Data (CCD). The school level categories are established according to the lowest and highest grades offered by school. The school level categories are defined as follows:

- Primary: schools with a low grade offered of prekindergarten through grade three (3) and a high grade of prekindergarten through grade eight (8). For the purposes of this study, pre-kindergarten enrollment counts are excluded from all analyses.
- Middle: schools with a low grade offered of four (4) to seven (7) and a high grade ranging from four (4) to nine (9).
- High: schools with a low grade offered of seven (7) to 12 and a higher grade of 12 only.
- Other: all other grade configurations, including ungraded schools.

(Source: <http://nces.ed.gov/ccd/data/txt/psu041alay.txt>)

The national district and charter school enrollment averages are derived from schools in the 2004-2005 CCD, excluding non-operational schools, schools located in rural areas and small towns and schools with a total student count equal to zero. The national average enrollment for each grade is calculated uniquely for each combination of school level and charter school status. All valid student enrollment counts, including zeros, are included in the calculations. This method yields several national enrollment averages for each individual grade. The multiple grade averages captures the variability in student enrollment counts by school level and charter school status. For example, six national average enrollment counts are generated for fourth grade. The average fourth grade enrollment is calculated for primary schools, middle schools, and schools categorized as “other.” Each of the three aforementioned average fourth grade enrollments also is calculated separately for charter and non-charter schools.

The individual national average enrollments for each grade are combined to create unique school level national enrollment averages by grade configuration and charter school status. For example, the national average school level enrollment count for charter schools that serve a K-6 grade configuration is the sum of the individual grade enrollment averages for primary grades Kindergarten through sixth grade in charter schools.

The enrollment for each for-profit school is then compared to the respective national school level average enrollment corresponding to the grade configuration served by the respective for-profit school. For example, the enrollment for a for-profit charter school with a grade configuration of K-6 is compared to the sum of the national average

charter school enrollment for primary grades K-6. See Appendix E for the national average enrollment counts by grade configuration, school level, and charter school status.

Methods for Compiling School Profiles

Compiled each year since 1998-1999, *Profiles of For-Profit Education Management Companies* documents the number of for-profit firms involved in managing publicly-funded schools, identifies the schools they manage, and records the number of students those schools enroll. The *Profiles* report is compiled from a combination of sources. Internet searches are conducted on the name of each known EMO to identify schools with which the EMOs have contractual relationships. The resulting lists of schools are compared with previous years' lists. When a school previously listed as having a relationship with a particular EMO appears to have dropped off the list, researchers use Internet search engines and news media databases, primarily Lexis-Nexis, to attempt to ascertain the reasons for the change. Telephone contacts are made with each EMO and the information gathered is sent to representatives of each EMO to verify its accuracy. Company representatives are asked to send additions and corrections to the Education Policy Studies Laboratory for inclusions in the next edition of the *For-Profit Profiles Report*.

The companies profiled represent those that CERU/EPRU researchers could positively identify as for-profit management companies, and are likely to represent only the larger or high-profile companies that exist. Since it is not possible to independently verify profitability status, all companies are labeled as "Unknown". Unlike publicly traded companies that are required by law to make earnings statements public, privately held companies have no such requirement.

Appendix E: Average National Enrollments

Table E-1: Average Enrollments for Average U.S. Charter and District Primary Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
K-1	97.99	165.18
K-2	142.30	246.83
K-3	184.96	328.89
K-4	226.37	410.82
K-5	265.55	491.45
K-6	300.97	558.23
K-7	334.90	611.03
K-8	365.50	676.24
1-6	250.51	476.83
3-7	192.61	364.19

Note: Averages were compiled using the 2004-2005 Common Core of Data.

Table E-2: Average Enrollments for Average U.S. Charter and District Middle Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
4-5	99.23	339.51
4-8	354.83	1142.14
5-8	314.65	984.60
6-8	255.60	802.63
7-9	208.65	680.53
7-8	176.08	553.18
9	74.66	330.44

Note: Averages were compiled using the 2004-2005 Common Core of Data.

Table E-3: Average Enrollments for Average U.S. Charter and District High Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
7-10	206.88	765.40
7-11	270.41	1046.18
7-12	328.05	1303.88
8-12	293.96	1233.40
9-10	139.22	637.82
9-12	260.39	1176.30
10-11	128.10	588.16

Note: Averages were compiled using the 2004-2005 Common Core of Data.

Table E-4: Average Enrollments for Average U.S. Charter and District Other* Schools by Grade-Level Configuration

Grade-level Configuration	Average U.S. Charter School Enrollment	Average U.S. District School Enrollment
K-9	371.87	343.78
K-10	415.68	416.60
K-11	453.08	471.27
K-12	487.19	522.38
4-12	343.88	453.64
6-10	207.59	312.83
6-11	245.00	367.51
6-12	279.10	418.62

Note: Averages were compiled using the 2004-2005 Common Core of Data.

*The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

Appendix F: District School Comparisons

As shown in Table F-1, the average district school in the U.S. is larger than most schools run by large-size EMOs. Among district (non-charter) schools run by large EMOs, about 70 percent are smaller than the average U.S. district school.

Table F-1: Enrollment Comparisons by School Level: District Schools Managed by Large-Size EMOs vs. U.S. District Schools

School level	Comparison to Average Enrollment of U.S. District Schools	Estimated Number of EMO District Schools	Estimated Percentage of EMO District Schools	Estimated Percentage of EMO District Students
Primary	Less than	28 (of 45)	62%	45%
	Greater than*	17 (of 45)	38%	55%
Middle	Less than	14 (of 17)	82%	68%
	Greater than*	3 (of 17)	18%	32%
High	Less than	5 (of 5)	100%	100%
	Greater than*	0 (of 5)	0%	0%
Other**	Less than	1 (of 2)	50%	26%
	Greater than*	1 (of 2)	50%	74%
All	Less than	48 (of 69)	70%	53%
	Greater than*	21 (of 69)	30%	47%

Note: Virtual schools are not included in these data. Percentages only reported as whole numbers.

Numbers and percentages are estimated because some EMOs did not respond to requests for data (Appendix B).

* “Greater than” includes schools with enrollments exactly equal to the national average. Very few schools actually have enrollments equal to the national averages.

** The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

Table F-2: Overall School Size Comparisons by Company: District Schools Managed by Large-Size EMOs vs. U.S. District School Average Enrollment

EMO	Number of EMO Managed District Schools Exceeding U.S. District School Average Enrollment	Percentage of EMO Managed District Schools Exceeding U.S. District School Average Enrollment	Percentage of Students Enrolled in EMO Managed District Schools Exceeding U.S. District Average Enrollment
Edison Schools	18	30%	46%
Victory Schools, Inc.*	3	50%	60%

Note: Virtual schools are not included in these data. Percentages only reported as whole numbers.

* Numbers and percentages are estimated because this EMO did not respond to requests for data (see Appendix B).

Table F-3: School Size Comparisons by School Level and Company: District Schools Managed by Large-Size EMOs vs. U.S. District School Average Enrollment

School level	EMO	Number of EMO Managed District Schools at This Level Exceeding U.S. District School Average Enrollment	Percentage of EMO Managed District Schools at this Level Exceeding U.S. District School Average Enrollment	Percentage of Students Enrolled in EMO Managed District Schools at This Level Exceeding the Average U.S. District School
Primary	Edison Schools	16	38%	56%
	Victory Schools, Inc.*	1	33%	42%
Middle	Edison Schools	2	13%	24%
	Victory Schools, Inc.*	1	100%	100%
Other**	Victory Schools, Inc.*	1	100%	100%

Note: Virtual schools are not included in these data. Percentages only reported as whole numbers.

* Numbers and percentages are estimated because this EMO did not respond to requests for data (see Appendix B).

** The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

Table F-4: Enrollment Comparisons by School Level: Charter Schools Managed by Large-Size EMOs vs. U.S. District Schools

School level	Comparison to Average Enrollment of U.S. District Schools	Estimated Number of EMO Charter Schools	Estimated Percentage of EMO Charter Schools	Estimated Percentage of EMO Charter Students
Primary	Less than	131 (of 187)	70%	53%
	Greater than*	56 (of 187)	30%	47%
Middle	Less than	7 (of 7)	100%	100%
	Greater than*	0 (of 7)	0%	0%
High	Less than	65 (of 66)	98%	94%
	Greater than*	1 (of 66)	2%	6%
Other**	Less than	27 (of 36)	75%	34%
	Greater than*	9 (of 36)	25%	66%
All	Less than	230 (of 296)	78%	58%
	Greater than*	66 (of 296)	22%	42%

Note: Virtual schools are not included in these data. Percentages only reported as whole numbers.

Numbers and percentages are estimated because some EMOs did not respond to requests for data (Appendix B).

* “Greater than” includes schools with enrollments exactly equal to the national average. Very few schools actually have enrollments equal to the national averages.

** The U.S. Department of Education defines “other” schools as schools that do not fall within the grade-level configurations of primary school, middle school, or high school. For definitions of school levels, see Appendix D.

Table F-5: Overall School Size Comparisons by Company: Charter Schools Managed by Large-Size EMOs vs. Average U.S. District School Enrollment

EMO	Number of EMO Managed Charter Schools Exceeding U.S. District School Average Enrollment	Percentage of EMO Managed Charter Schools Exceeding U.S. District School Average Enrollment	Percentage of Students Enrolled in EMO Managed Charter Schools Exceeding U.S. District School Average Enrollment
Charter School Administrative Services*	3	20%	45%
Charter Schools USA	11	73%	83%
Edison Schools	20	54%	70%
Helicon Associates*	3	21%	57%
Leona Group, LLC	1	2%	5%
Mosaica Education*	4	12%	23%
National Heritage Academies	24	45%	51%

Note: Virtual schools are not included in these data. Percentages only reported as whole numbers.

* Numbers and percentages are estimated because this EMO did not respond to requests for data (see Appendix B).

Table F-6: School Size Comparisons by School Level and Company: Charter Schools Managed by Large-Size EMOs vs. U.S. District School Average Enrollment

School Level	EMO	Number of EMO Managed Charter Schools at This Level Exceeding U.S. District School Average Enrollment	Percentage EMO Managed Charter Schools at this Level Exceeding U.S. District School Average Enrollment	Percentage of Students Enrolled in EMO Managed Charter Schools at This Level Exceeding Average U.S. District School Enrollment
Primary	Charter School Administrative Services*	1	10%	16%
	Charter Schools USA	10	77%	85%
